

Program to find some text in PDF files

Before use consider if your files are text or scans?

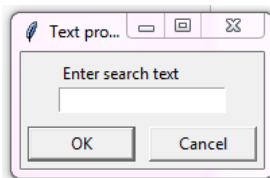

If you select folder with a huge count of files calculation will take all day!

How to start:

1. Open **find_word_in_pdf.exe**
2. Select a folder (don't worry when you don't see any files)

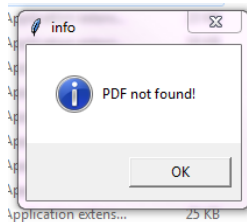

3. Type search text (it isn't case sensitive):

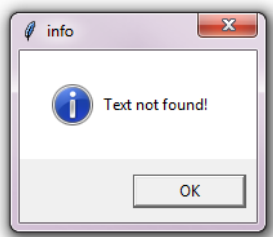

4. Wait for result:

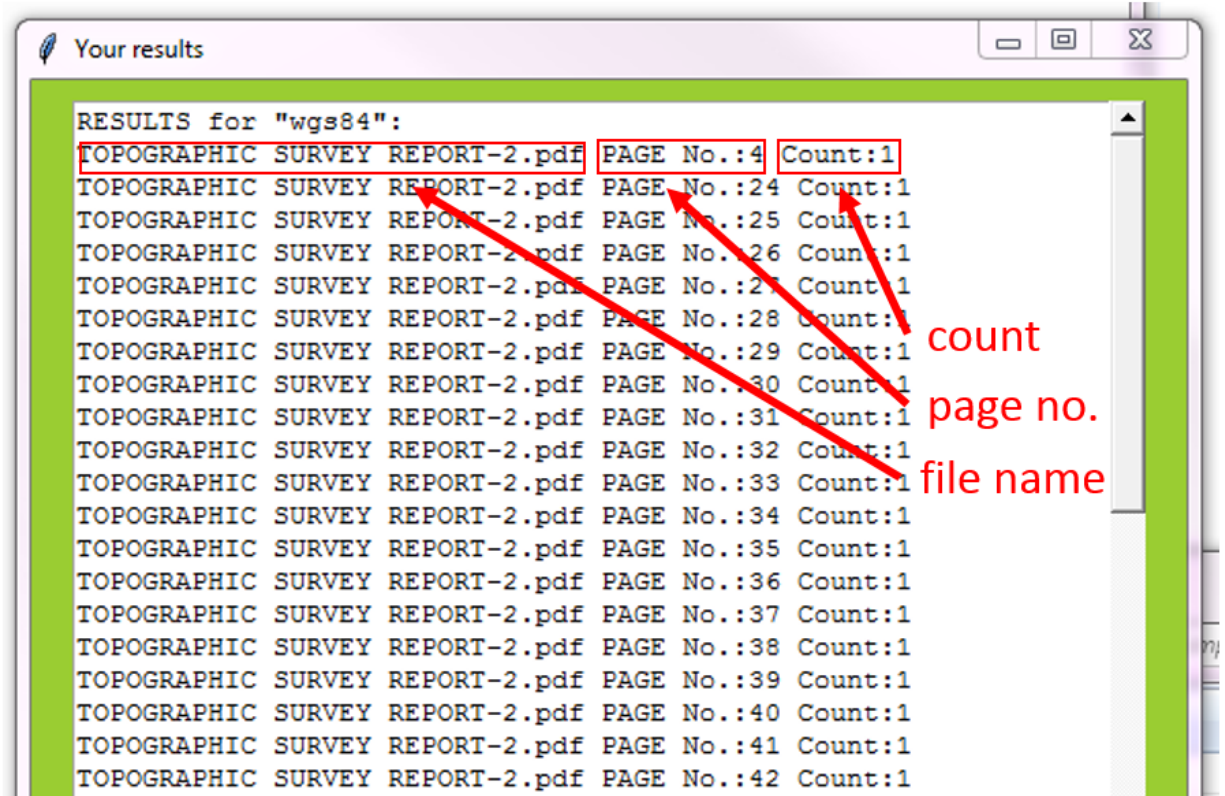

- a) When in selected folder PDFs don't exist

- b) When text not found

c) When text found:

RESULTS for "wgs84":

TOPOGRAPHIC SURVEY REPORT-2.pdf	PAGE No.:4	Count:1
